Sub : No use of Mobile Phones in Ammonia Storage area

This is to inform that Mobile Phones are not intrinsically safe, meaning that they have potential to produce spark of such intensity that it could ignite a vapour air mix. Hence, it is pertinent to keep this potential source of ignition away from critical area of "Ammonia Storage".

Henceforth, the employees working in "Ammonia Storage" area and the visitors are advised to deposit their mobile in Ammonia Control Room while on Duty in this area and **strictly not to carry** the same during field visit of the Ammonia Storage Tanks.

All concerned are requested to comply with the above instructions towards ensuring utmost safety in Plant area.
