CIRCULAR

Sub: Segregation of Organic Waste materials by township residents and vendors

This is for information to all residents of Surinder Jakhar Nagar Township that an **Organic Waste Composter Machine** of 1000 kg per day capacity has been installed near gas godown (behind nursery). This machine converts organic waste into nitrogen rich compost.

As a responsible citizen and to make our township environment garbage free, all residents are advised to segregate organic waste (leftover food waste, fruit & vegetable skins etc.), into one dustbin and rest of the garbage in another, provided by Estate Office to the garbage collecting vendor. **Henceforth, mixed garbage will not be accepted by the concerned working staff.**

All the township residents are hereby informed to segregate and then handover the organic waste materials in the dustbin provided to support the cause of clean and hygienic environment.

Cooperation of all is solicited.
